Projects

Dental Management System with Barcode – PHP, MySQL, Bootstrap

Built a system for dental clinic with patient records, appointments, and billing.

Student Portal System – PHP, MySQL, Bootstrap, HTML, JavaScript

Developed a portal with student profiles, grades, and announcements.

E-commerce System – PHP, MySQL, Bootstrap, HTML, JavaScript

Designed an e-commerce platform with cart, checkout, and product management.

Kanban Task Management System – React + Laravel

Created a task board application to manage workflows efficiently.

Experience

Freelance Web Developer | 2024-2025

- Assisted students in designing, developing, and deploying capstone and academic web systems
- Developed a complete e-commerce system with product management, cart, and checkout functionality using PHP, MySQL, Bootstrap, HTML, and JavaScript.
- AI Driven System for Assessment of College Research Presentations - fixed critical PHP bugs, improved data handling and database execution logic, and implemented new features to stabilize the system.

Valenin IT Services | March 2025 - June 2025

Position: Web Developer Intern

- Assisted in developing and maintaining web applications using **React** and **Laravel**.
- Designed and completed the responsive front-end layout of a **Kanban** system, primarily built **independently** using HTML, CSS, Bootstrap, and React.
- Contributed to backend development using **Laravel** (PHP, MySQL).
- Coordinated with the **supervisor** through meetings to discuss code progress and task updates.
- Used **Jira** for task tracking and **GitHub** for version control in a collaborative workflow.
